

Film Inventory

From HSD Film Library – *The following are commercially produced films that were available for purchase from educational supply houses for schools and libraries from the 1970's. All are 16mm, color and with sound. Without spending too much time, I included the production company/copyright holder in italics at the bottom of the entry for each individual title. If there was a youtube link I included that as well.*

Preservation Recommendation: *To digitize one of each title for RESEARCH PURPOSES ONLY for use as a viewable example of the materials used by the Highline School District teachers to prepare students for visiting Camp Waskowitz.*

Have the materials duplicated onto a hard drive (7~10 year life expectancy) and Archival Preservation DVD (approx \$100 per disc)

Then to identify the best film copy to keep and recycle the metal cans and rolls and storing the preservation master copy on archival plastic reels and in archival cans. Purchase these before sending the films out for duplication. That way they can be loaded at the correct tension on to the new reels.

Storage on their sides in the safe is the correct way to store them.

Shopping list:

Archival Plastic Film Cans and Reels

Film handling, anti-static gloves

Hard Drive

Archival Preservation DVD's

Hand-crank film viewing station. Including two hand-crank film winders and a viewing module for 16mm film

(I recognize a number of these that were shown at schools back in the 1970's or on TV. A very good friend of the family used to create these, along with travelog films that ran on TV. KW)

"Water in the Wilderness" – Outdoor Education Camp Waskowitz Conservation Kit G-1 10min Color Sound

"Water in the Wilderness" -- Outdoor Education Camp Waskowitz Conservation Kit L 10min Color Sound

"Water in the Wilderness" -- Outdoor Education Camp Waskowitz Conservation Kit J 10min Color Sound
